

Thomas Bieber, MD PhD MDRA

Thomas Bieber is a guest professor of dermatology and allergy at Ludwig-Maximilian University in Munich, Germany; scientific advisor for the research groups and the medicine campus of the Christine Kühne-Center for Allergy Research and Education in Davos, Switzerland; and founder and senior consultant at Bieber Dermatology Consulting, a firm specialized in advising pharmaceutical companies and investors in drug development strategy for medicinal products in dermatology and allergy.

Professor Bieber has special expertise in translational and precision medicine approaches for skin diseases and has furthered the development and approval of many recent systemic therapies, especially for atopic dermatitis.

He has authored or coauthored more than 1,100 publications, 676 of which are original publications and review articles (>55,000 citations; *h*-index = 113), more than 100 book chapters and several books on AD and precision medicine. He has been recognized as a highly cited researcher by Clarivate and top 10 cited researchers of the University of Bonn in 2023, 2024, and 2025.

He is a member of the German National Academy of Sciences Leopoldina. He was chief editor of *Allergy*, the official journal of the European Academy of Allergy and Clinical Immunology, from 2010-2017.

The many honors and awards he has received include the Heisenberg Fellowship from the German Research Council, the Karl-Hansen-Award from the German Society of Allergy, the Pharmacia International Research Award, and the Gold Medal of the Foundation for Allergy Research in Europe. He has been invited to many distinguished lectureships in many countries, including the Robert Cooke Memorial Lectureship, Dohi Memorial Lecture, Bruno Bloch Memorial Lectureship, Karl Herxheimer Memorial Lectureship, Otto Braun-Falco Memorial Lectureship, and the Erich Fuchs award.

He received his degrees in medicine (MD) and biology (PhD in immunology) from the University of Louis Pasteur in Strasbourg, France, trained in dermatology and allergy at the University of Louis Pasteur in Strasbourg and the Ludwig-Maximilian University in Munich, where he started his academic career.

From 1997 to 2023, he was chair at the Department of Dermatology and Allergy at the University of Bonn in Germany. There, he earned a master's degree in drug regulatory affairs (MDRA), achieving special expertise in preclinical and clinical drug development strategies and in legal and market access aspects of drug development.

From 2014 to 2023, he was project leader of the Christine Kühne-Center for Allergy Research and Education (CK-CARE), which he still serves as a scientific advisor. He founded the nonprofit biotech company Davos Biosciences under the umbrella of the Kühne Foundation.
