

Patrick M. Brunner, MD MSc

Patrick Brunner is the associate professor of dermatology and director of the Cutaneous Lymphoma Clinic in the Kimberly and Eric J. Waldman Department of Dermatology at Icahn School of Medicine at Mount Sinai in New York City, NY, USA.

As a clinician scientist with a strong interest in skin immunology, he is seeing patients suffering from chronic inflammatory skin diseases such as atopic dermatitis (eczema) and vitiligo, as well as primary cutaneous immune cell malignancies. He also heads a translational research group aimed at developing a better understanding of the immunobiology in cutaneous lymphomas, atopic dermatitis, and vitiligo and better treatment modalities for this patient population.

Dr. Brunner obtained his MD degree from the Medical University of Vienna, Austria. He completed his residency in dermatology at the Department of Dermatology at the Medical University of Vienna (General Hospital Vienna) under the mentorship of Dr. Georg Stingl. He then joined the Laboratory for Investigative Dermatology at The Rockefeller University in New York, obtaining a master's degree in clinical and translational sciences, and performed research on atopic dermatitis under the mentorship of Drs. Emma Guttman and James G. Krueger.

In 2018, he returned to Vienna to build a research group focusing on cutaneous immunobiology of chronic inflammatory skin diseases and primary cutaneous lymphomas, to better understand how individual immune cells orchestrate skin inflammation in benign and malignant conditions. In 2021, he joined the Icahn School of Medicine at Mount Sinai in his current role.
