

Nick Reynolds is Professor of Dermatology in Newcastle upon Tyne UK. After qualifying in medicine from the University of London, he received his dermatology and academic training in Bristol, Ann Arbor Michigan, USA and Newcastle upon Tyne.

He clinical and research interests are centred on atopic eczema, psoriasis, human models of skin disease, systems biology and precision medicine. He runs a dedicated tertiary referral clinic for adults with atopic eczema. His group published one of the first stratified medicine studies in dermatology, a RCT of azathioprine in atopic eczema that utilised pharmacogenetic-based dosimetry. Between 2016 and 2019, he was Director of Newcastle's MRC/EPSRC Molecular Pathology Node, one of six units established in the UK to bring researchers, clinicians and industry together to develop molecular diagnostic tools for personalized medicine.

Nick was the inaugural Chair of UK TREND (Translational Research Network in Dermatology), is past president of the European Society for Dermatological Research (ESDR) and currently president of the European Dermatology Forum (EDF). He is a board member of the IEC, co-leads the education committee, is co-author of the atopic eczema chapter in Rook's Textbook of Dermatology and has contributed widely to educational and mentorship events, particularly focused on trainees. He has received a number of honours and awards, including the Rudi Cormane and the Eugene M Farber lectureships and in 2019 was selected as a NIHR Senior Investigator.
