

Marjolein De Bruin-Weller, MD PhD

Marjolein de Bruin-Weller is full professor and head of the National Expertise Center of Atopic Dermatitis in the Department of Dermatology and Allergology at the University Medical Center Utrecht in Utrecht, The Netherlands.

Her major interest is clinical and translational research in atopic dermatitis. She is the principal investigator in several clinical trials and investigator-initiated studies focused on difficult to treat atopic dermatitis and systemic immunosuppressive and immuno-modulating treatment. She is an international expert in Real World Evidence (RWE).

In 2018, she initiated the BioDay Registry in the Netherlands. This registry is focused on the new advanced systemic treatments in atopic dermatitis and includes a significant amount of data regarding atopic dermatitis (signs, symptoms, quality of life, work impairment) as well as data on atopic comorbidities. Since 2023, patients with prurigo nodularis have been included in BioDay. More than 2,600 patients from 19 sites in the Netherlands are included in the BioDay registry, and five Brazilian centers recently joined BioDay.

Together with Femke van Wijk, professor of tissue immunology at the Center of Translational Immunology (CTI) of the University Medical Center Utrecht, Dr. de Bruin-Weller leads the translational atopic dermatitis research group.

Dr. de Bruin-Weller is chair of the expertise group Allergy and Eczema of the Dutch Society of Dermatology and Venereology and a member of the European Task Force of Atopic Dermatitis (ETFAD), the International Eczema Council (IEC) and the GA²LEN ADCARE Task Force. She is chair of the advisory board of the Dutch Patient Society for Atopic Dermatitis (VMCE) and member/chair of several Dutch committees regarding advanced systemic treatments in inflammatory diseases.
